

Mac DNS Setup

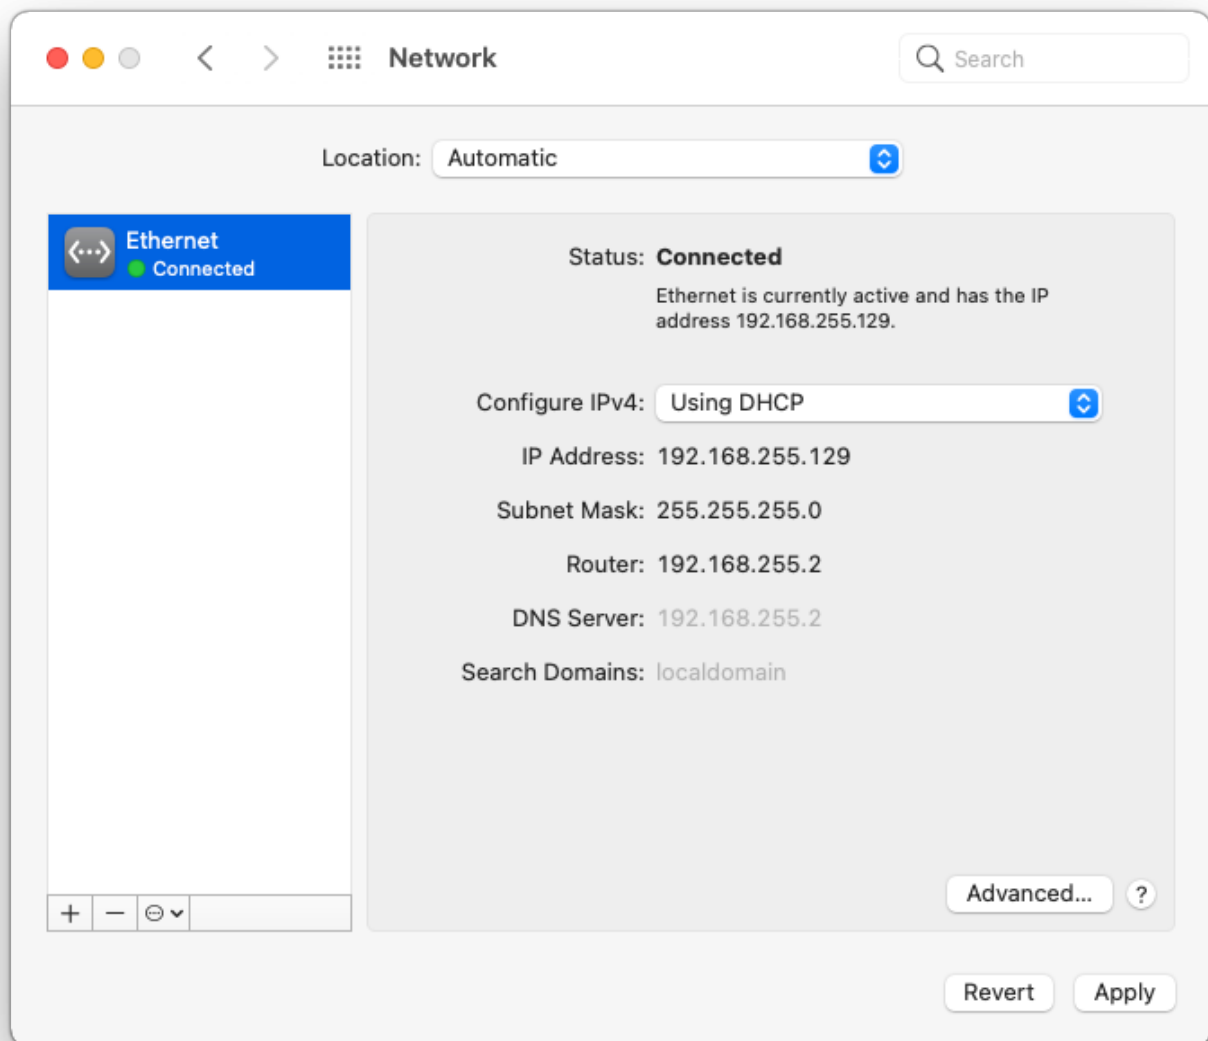

1. Navigate to the Mac OS "System Preferences".

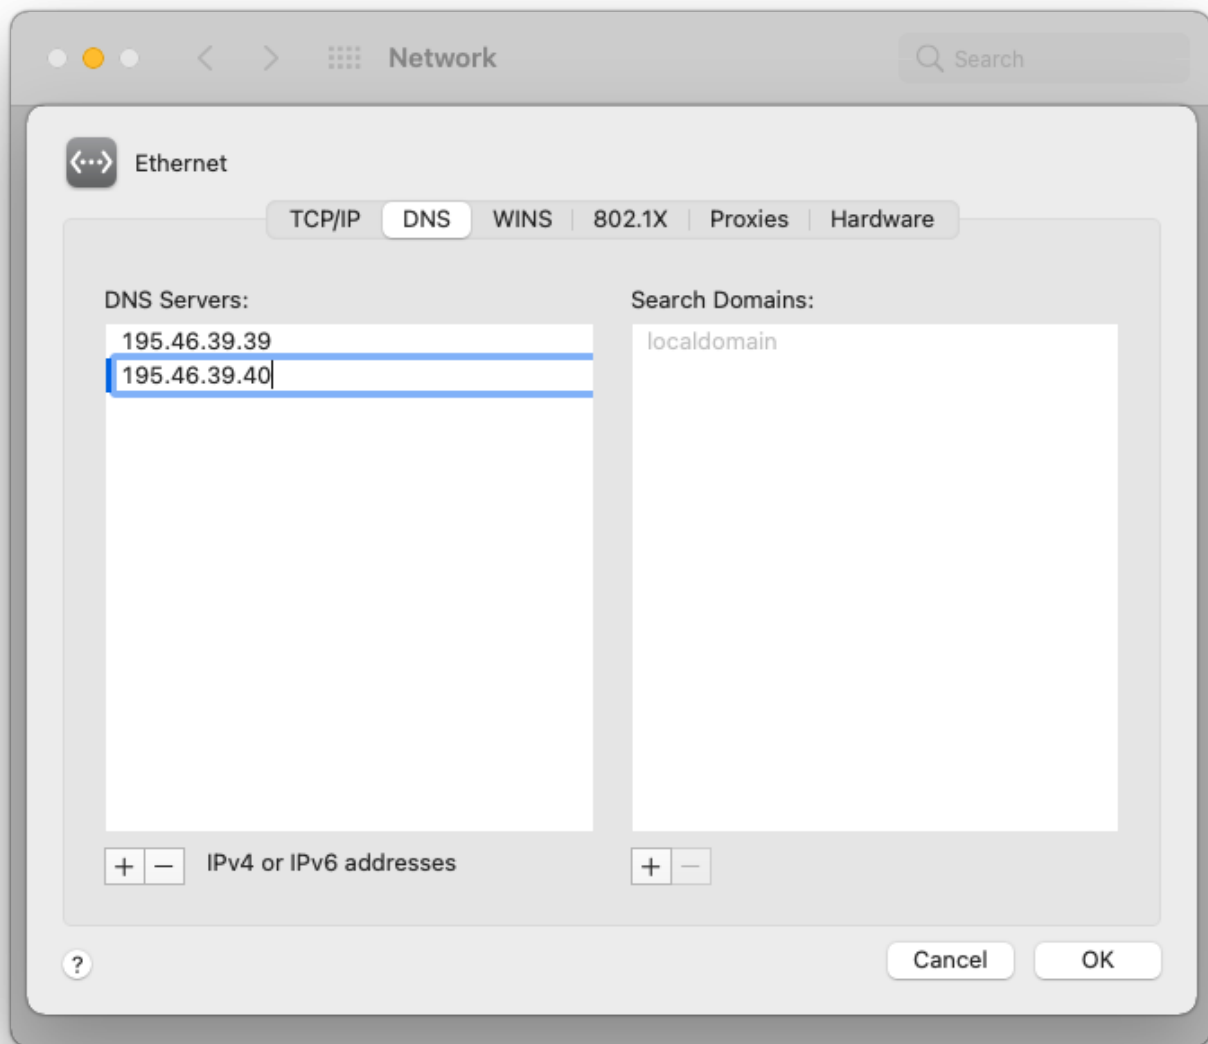

2. Click on the "Network" in the "Internet & Wireless" section of the opened window.

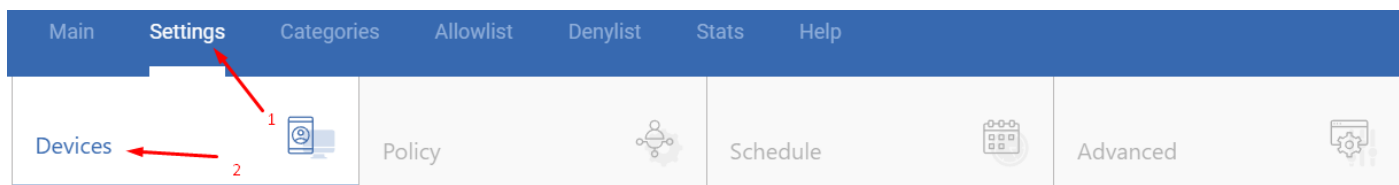

3. Choose an active connection from the list and click the "Advanced" button.

4. Select the "DNS" tab, add SafeDNS servers **195.46.39.39** and **195.46.39.40**, and click "OK".

5. Navigate to the SafeDNS **Dashboard > Settings** and copy your IP address in the "**Enter an IP address or DynDNS**" box. Click "**Add**".

Devices

Your IP address	Copy IP address	IPv4 DNS-servers addresses	IPv6 DNS-servers addresses
[REDACTED]		195.46.39.39 195.46.39.40	2001:67c:2778::3939 2001:67c:2778::3940

IP addresses/DynDNS 0/3 ^

Add IP address or DynDNS

Paste IP address **Select filtering policy**

IP address/DynDNS	Policy	Comment
List is empty		

Your Mac is now filtered with the SafeDNS filtering policy.

Please note that settings take 5-7 minutes to apply.
Stats and filtering status update every 10 minutes.
