

Running the SafeDNS Uninstaller script

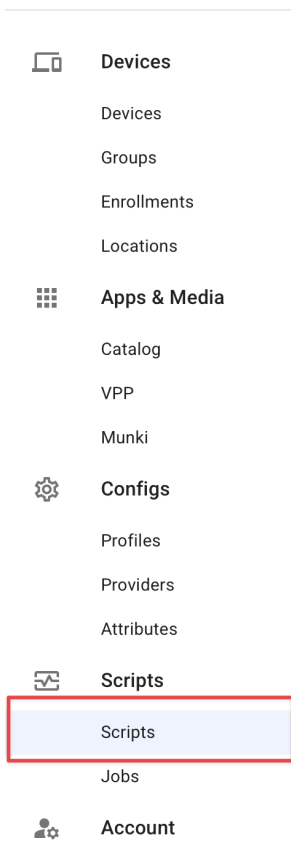

Use this guide to upload the **SafeDNS Uninstaller.sh** file to uninstall **SafeDNS Endpoint Lite**

1. Download the file

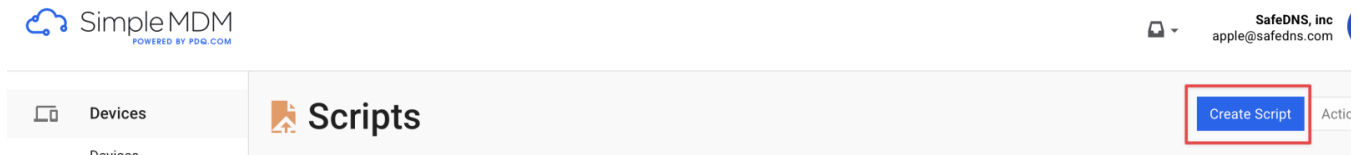

Download link: [SafeDNS Uninstaller.sh](#)

2. Upload the script to SimpleMDM

1. Go to **Scripts**

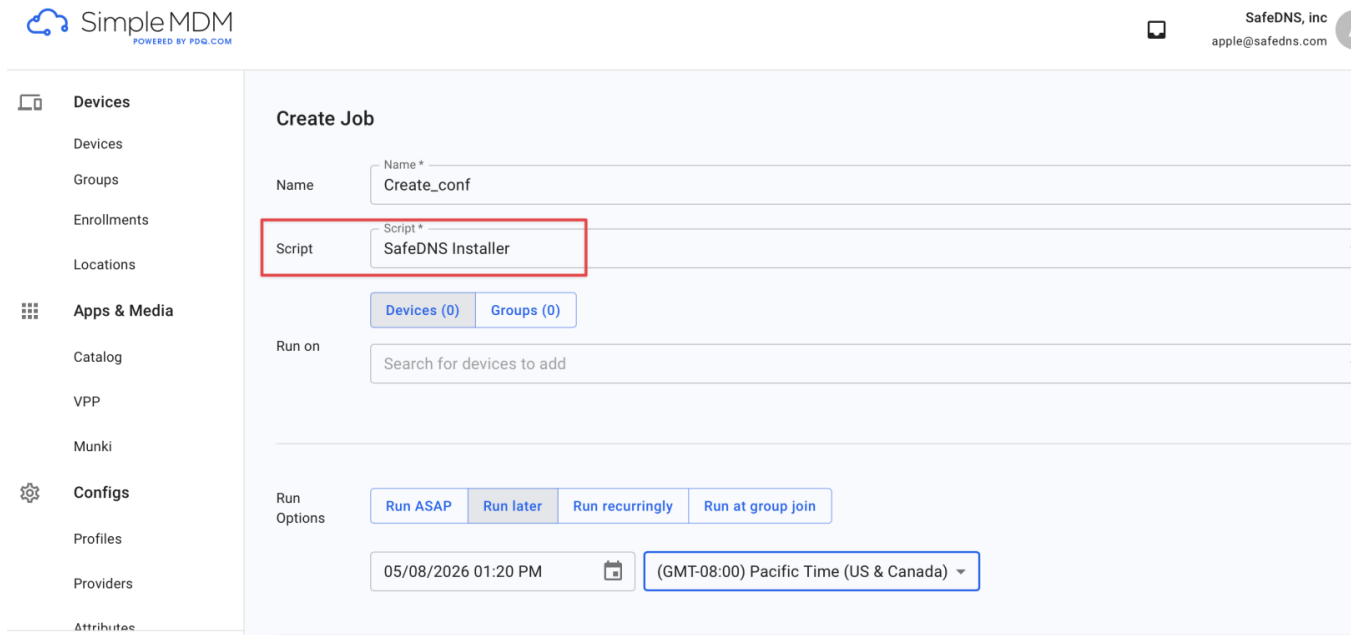

2. Click on **Create Script**

3. Give it a name, for example **SafeDNS_uninstaller**, upload the **SafeDNS Uninstaller.sh** file, and click **Save**.

3. Run the script on target devices

1. Go to **Jobs > Create Job**.

2. Select the **SafeDNS Uninstaller.sh** file downloaded earlier, choose the target devices or device groups, configure the run option, and run the job.
