

# SafeDNS Agent for Linux Setup

Installation requirements: Debian 9, Ubuntu 18-22, PopOS, CentOS 7.

The Agent is available on the following billing plans: **Safe Family, Pro, Pro Plus**, and archived **Safe@Home, Safe@Office**.

## Getting Started

1. Log in to your SafeDNS account with your registration email and password.
2. Navigate to the **Getting Started** tab on the main page of the **Dashboard** and select the Linux button. Choose and download the needed package: **.rpm** or **.deb**.

The screenshot shows the SafeDNS dashboard interface. On the left is a sidebar menu with options: Main, User administration, Settings, Categories, Allowlist, Denylist, Stats, New Stats (Beta), Help, and Account. The main content area has a 'Getting started' section. At the top of this section, there's a toggle for 'Filtering is enabled'. Below that, a message states: 'The statistics will be visible in approx 10 minutes. You can grab a coffee while we prepare the statistic for you.' To the right of the 'Getting started' section is an 'Account' box showing 'Your IP address'. The 'Getting started' section includes a 'Setup guide for:' area with buttons for Routers, Windows, Linux (highlighted with a red arrow), MacOS, Android, and iOS. Below this, the 'Linux' section contains two steps: '1. Download the Agent for Linux .deb / .rpm' (with a red arrow pointing to '.deb / .rpm') and '2. Follow the instructions and install Agent'. A 'Guide' button is at the bottom left of the Linux section. On the right, there's a video player thumbnail with a play button.

.rpm package

Use the following command for the installation from the Terminal app:

```
sudo rpm -Uvh /home/user/Downloads/safedns-agent-1.3.1-x86_64.rpm
```

Please note, that the path to the file and/or package name might be different.

## .deb package

For experienced users. You can use this command to install from the Terminal app:

```
sudo dpkg -i /home/user/Downloads/safedns-agent-1.3.1-x86_64.deb
```

Please note, that the path to the file and/or package name might be different.

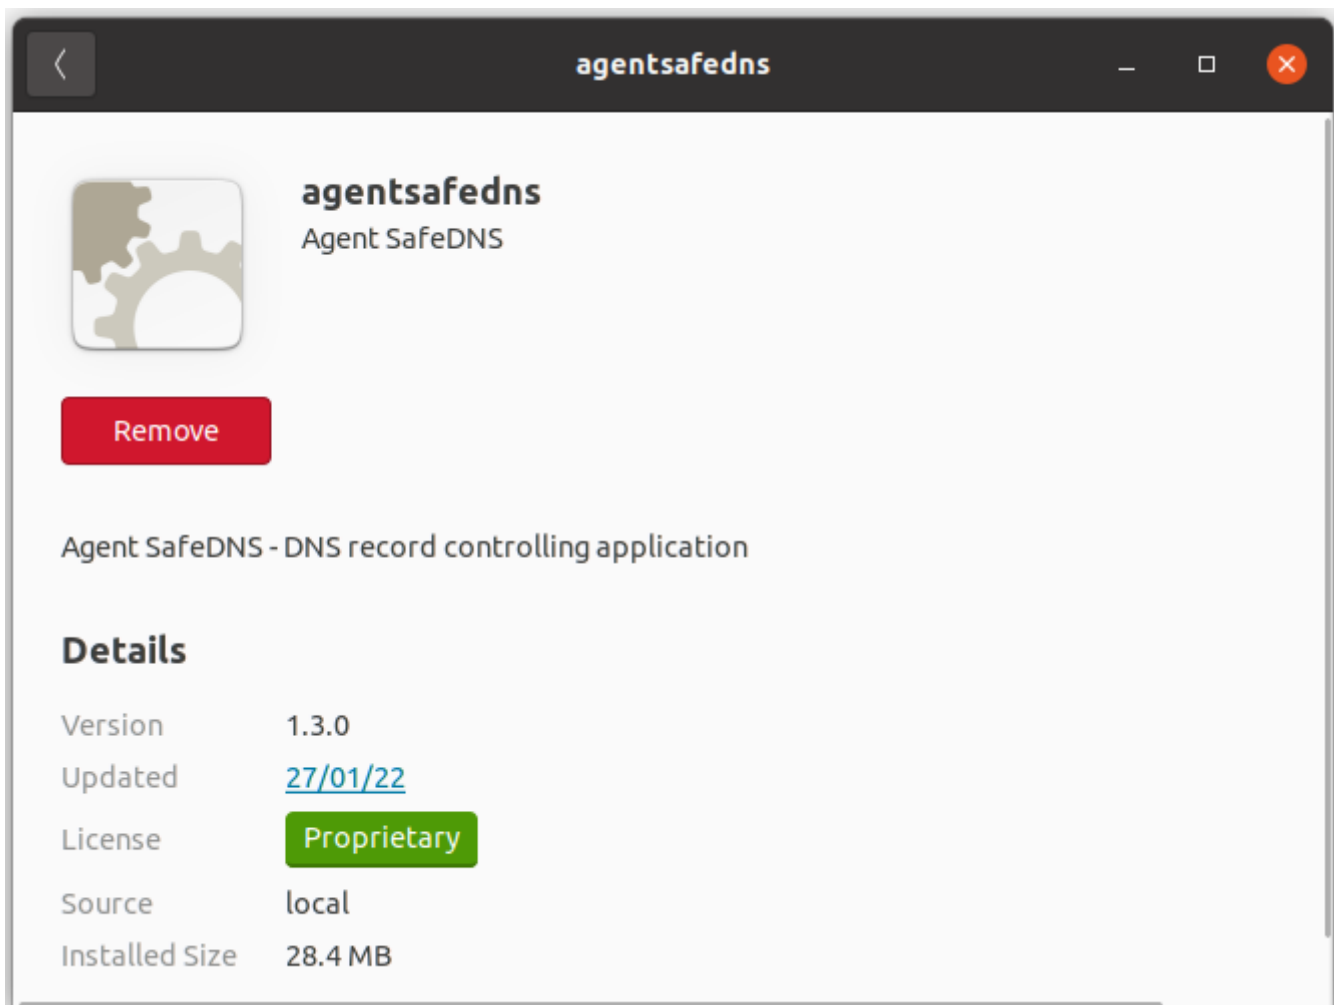

1. Open the “Downloads” folder:

2. Run the downloaded file and install the Agent. Enter the Admin password if prompted.

3. You will see the following window once the installation finishes:

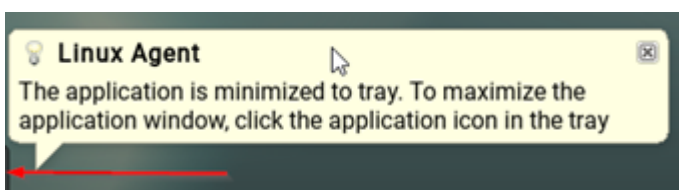

## Agent Setup

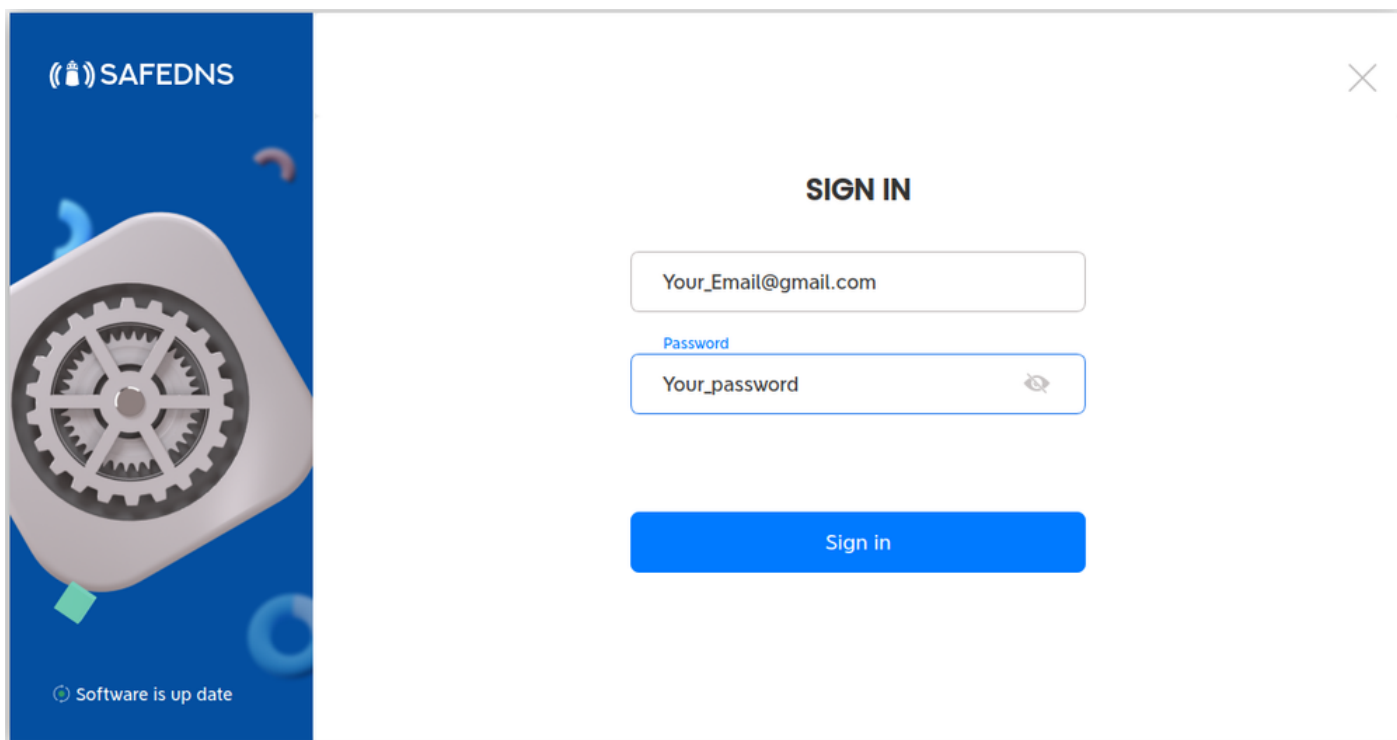

1. **Restart your system.** The Agent icon will appear in the system tray.
2. Open the Agent by clicking on the icon in the system tray.

!On **Debian 9**, click on the black line in the bottom right corner, if the tray icon is hidden.

3. Enter your SafeDNS account credentials in the opened window.

The image shows a 'SIGN IN' window for SafeDNS. On the left is a blue sidebar with the SafeDNS logo, a gear icon, and the text 'Software is up date'. The main area is white and contains the title 'SIGN IN', an email input field with placeholder 'Your\_Email@gmail.com', a password input field with placeholder 'Your\_password' and a toggle icon, and a blue 'Sign in' button.

## Additional settings

To ensure the Agent was installed correctly, please navigate to the "**Settings**" tab in the [SafeDNS Dashboard](#) and scroll down to the bottom.

If you see the record with the Device name and your IP address, it means that the filtering is working.

Agents				
<div>Agent <span>×</span> <span>🔍</span></div>				
Device	OS	Policy	Comment	Last seen
Default 11 (10.0.2.15)	debian 11	Default		6 hours ago

After that, you can adjust the filtering Policy according to your needs. You can select categories to block [here](#).

**Don't forget to click the "Save changes" button.**

A blocked website will display an error message that the Access is closed:

If the filtering doesn't work according to your policy settings, [clear the cache of your browser](#).

Please note, that settings take 5-7 minutes to apply.  
Stats and filtering status update every 10 minutes.

## Uninstallation

For the **.rpm** package, use the following command:

```
sudo rpm -e agentsafedns
```

For the **.deb** package, use the following command:

```
sudo apt-get remove agentsafedns
```

Enter **"y"** if prompted to confirm the Agent removal.
