

# Verizon Router Setup

## Router with Static IP address configuration

1. Go to SafeDNS **Dashboard > Settings > Devices** and copy your IP address to the "**IP addresses / DynDNS**" box, choose a policy, and click "**Add**".

The screenshot shows the SafeDNS dashboard. On the left is a sidebar with a 'Settings' menu containing 'Devices', 'Policy', 'Schedule', and 'Advanced'. Below this are 'Categories', 'Allowlist', and 'Denylist'. The main area displays 'Your IP address' as 162.210.194.38 and 'IPv4 DNS-servers addresses' as 195.46.39.39 and 195.46.39.40. Below this is a table titled 'IP addresses/DynDNS' with 0/13 entries. A form below the table allows adding a new IP address or DynDNS entry. The form has a text input field containing '162.210.194.38', a dropdown menu set to 'Default', a 'Comment' field, and 'Add' and 'Edit as List' buttons.

Your IP address	IPv4 DNS-servers addresses	IPv6 DNS-servers addresses
162.210.194.38	195.46.39.39 195.46.39.40	2001:67c:2778::3939 2001:67c:2778::3940

IP addresses/DynDNS 0/13

Add IP address or DynDNS

2. Locate the network configuration on your router and set the SafeDNS server- 195.46.39.39 and 195.46.39.40

To do that, click on the icon My Network and browse the Network Connection option:

My Network > Network Connections

3. Locate in the connection list the Broadband Connection with the status: Connected:

On the next screen locate the Settings button and press it:

4. Change the DNS server option by selecting the “Use the Following DNS Server Addresses”

The screenshot shows a configuration window with the following fields and controls:

- DHCP Lease:** [Renew] [Release]
- Expires In:** 93 minutes
- DNS Server:** A dropdown menu is open, showing three options:
  - ✓ Obtain DNS Server Address Automatically
  - Use the Following DNS Server Addresses (highlighted)
  - No DNS Server
- IP Address Distribution:**
- Routing Mode:** [NAPT]

An orange arrow points from the 'DHCP Lease' label to the 'DNS Server' dropdown menu.

5. Once the option is changed, the fields are activated where you can set the SafeDNS DNS servers:

The screenshot shows the same configuration window as above, but with the 'DNS Server' dropdown set to 'Use the Following DNS Server Addresses'. The fields are now active:

- DHCP Lease:** [Renew] [Release]
- Expires In:** 92 minutes
- DNS Server:** Use the Following DNS Server Addresses
- Primary DNS Server:** 195 . 46 . 39 . 39
- Secondary DNS Server:** 195 . 46 . 39 . 40
- IP Address Distribution:** [Disabled]

Two orange arrows point from the 'DNS Server' dropdown to the 'Primary DNS Server' and 'Secondary DNS Server' input fields.

195.46.39.39 and 195.46.39.40.

**You have successfully configured your router.**

Please note that settings take 5-7 minutes to apply.
