

16. Adding IP address range to the SafeDNS dashboard.

Adding IP addresses range to the SafeDNS dashboard.

1. When you need to add an IP address range to the dashboard (e.g. 192.168.100.0/24) copy these characters to an Excel file or in Google tables (<https://docs.google.com/spreadsheets>) as shown below:

2. Change characters to the initial IP address and then pull down the pointer from the lower right corner of the first cell:

A1:A11	fx 192.168.100.0
	A
1	192.168.100.0
2	192.168.100.1
3	192.168.100.2
4	192.168.100.3
5	192.168.100.4
6	192.168.100.5
7	192.168.100.6
8	192.168.100.7
9	192.168.100.8
10	192.168.100.9
11	192.168.100.10

27	
28	
29	
30	
31	

3. Pull down the cursor until it reaches the 257 row, then release the pointer.

Then copy all cells to the cache (operative memory).

	A
232	192.168.100.231
233	192.168.100.232
234	192.168.100.233
235	192.168.100.234
236	192.168.100.235
237	192.168.100.236
238	192.168.100.237
239	192.168.100.238
240	192.168.100.239
241	192.168.100.240
242	192.168.100.241
243	192.168.100.242
244	192.168.100.243
245	192.168.100.244
246	192.168.100.245
247	192.168.100.246
248	192.168.100.247
249	192.168.100.248
250	192.168.100.249
251	192.168.100.250
252	192.168.100.251
253	192.168.100.252
254	192.168.100.253
255	192.168.100.254
256	192.168.100.255
257	192.168.100.256
258	

4. Go to the SafeDNS dashboard "Settings" -> "Devices" tab and press the "Edit as list" button.
